

## NEWS OF THE MINING WORLD

## DEVELOPMENT OF NEW PLACER DIGGINGS IN IDAHO.

**Important Discovery of Zinc in New Mexico**  
—Salvation Army Men Mining with Success in Arizona—One of the Biggest Diggings in the History of the Black Hills—Reports from Colorado Centra.

**Idaho City, Sept. 30.—The Lemhi Placer Gold Mining Company, operating near Salmon City, anticipate big operations in the near future. The work of the present year has only been for the purpose of ascertaining the richness of the ground. Next spring work will commence on the big Lemhi Canal, which, when completed, will be seventy miles long and supply water for a large amount of placer ground.**

Work and improvements on the Morning mine at Mullen go on. The improvements and developments proposed will make the property one of the greatest producers of the Cœur d'Alene country. The concentrator, when completed, will concentrate 1,000 tons per day. The company is constructing a mile-long, grade railroad from the mine to a spring.

The company that has a hand in the Hillman mine, west of Bear River, have seven men at work running a long tunnel to cut the vein at considerable depth below the old works. The mine is a large one and the ore is rich in silver. Cox Works has a gold mine near the Salmon River, Deadwood district, under bond to the Milwaukee and Idaho Company. J. D. Smith, manager of the company, has six cars out with seven or eight men to develop the mine.

The extensive silver claims at Deadwood, superintended by Mr. Cattin, have been runnig all summer. A clean-up will be made next week. This is the first man made, as three years have been spent digging along ditch and putting in a mile or two of bed-rock flume.

Thomas Barry is developing a fine gold mine out of the Golden Era in Sunn Plat. The intention is to ship in a mill either this fall or as early as possible next spring.

The Gold Hill twenty-five-stamp mill at Quartzburg continues running day and night.

The company is sinking the shaft 100 feet deeper as the upper levels are worked out. The ledge in the lower works is twenty feet wide, all of which is milled.

Owing to the low price of silver only 1,200 tons of ore from the Solace mine will be worked this year. It is now at the Vienna mill, which will commence crushing in a few days.

A new district twenty miles north of Montpelier in Bear Lake county promises to become of much importance. Some of the ore contains 75 to 80 percent lead. A car load of carbon in the Blackfoot, which is owned by A. C. L. James, Edwards and John Lyons, once owned them \$750, and they lost two loads made some kind of ore ready for shipment, the others being the North Star group, which is reported to contain 150 to 250 feet south of the North Star group is the Pluto, which was recently purchased by Messrs. Tidder, Walton & Co. of New York. In this report it is said: "The uprooted rock is very well developed, and some of them small stones have been made from which much rich ore has been taken out, and all time not dirt time has been spent in getting the ore out."

The Pluto is being built by the Gold Dust Company to their mines, to haul the ore to the mill. The company now have a large amount of ore on the dump ready for treatment.

At Piney, in the Clear Creek properties that is rapidly coming to the front as a heavy producer of silver ore. A mine has been opened by the Gold Dust Company. The mine is opened by a tunnel and shaft with the usual drifts. A contract has been let to get a drift 100 feet deep, and a tunnel 100 feet long.

The hole already shows a width between walls of twenty-five feet, and in the bottom of the shaft the ledge is three and one-half feet thick, and the vein is two and one-half feet wide. The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

**Leadville, Oct. 6.—** The Berdella mine is to erect a 20-stamp mill and other machinery for developing the property.

The copper mine has let two contracts to run tunnels in their hole fifty feet each, upon which miners are now working two shifts each.

The mine is being built by the Gold Dust Company to their mines, to haul the ore to the mill.

The hole already shows a width between walls of twenty-five feet, and in the bottom of the shaft the ledge is three and one-half feet thick, and the vein is two and one-half feet wide. The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold, and ran well in lead to the ton, and the vein is still running.

The vein has given seventy-two-tenths of an ounce of gold,
